

## Heart of Pitsea - Costed Vision

With the million pounds, we would like to have achieved bringing the community together, raised aspiration and skills, increased confidence, made the area safer and cleaner for our residents.

Our vision remains the same: Our vision is for an engaged community that creates opportunities for everyone and feels good about itself

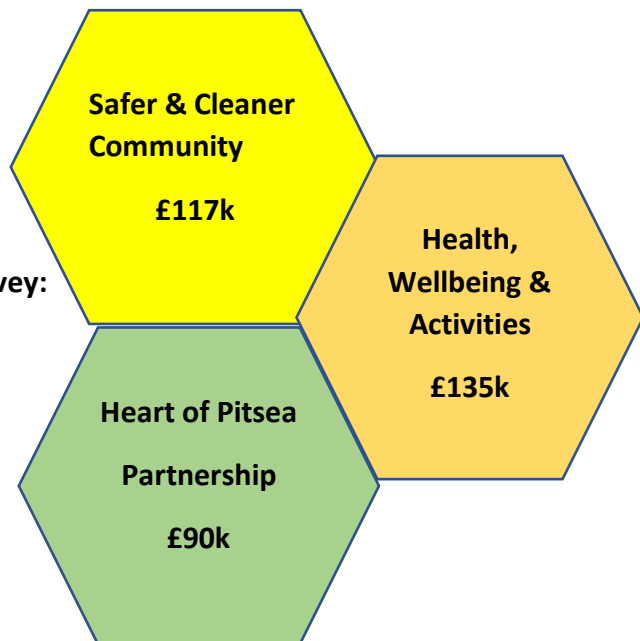

The HoP priorities are broadly the same with new headings, Health, Wellbeing & Activities / Safer & Cleaner Community / HoP Partnership

### The total remaining for our Costed Vision is £342k broken down as:

Partnership including LTO £90k

Health, Wellbeing & Activities £135k

Safer & Cleaner Community £117k

### Quotes from residents during our recent survey:

I think it would be a real benefit to the local community if more activities were arranged across the ages.

No one has a wheely bin. Every week rubbish is left on the street in bags. Every week rodents and pests appear and scatter rubbish round the streets

The old bingo hall is derelict, it seems dangerous to be near it and every day its full of pigeons that are so dirty, and it is encouraging rats.

There is crime, drug dealers on the streets and threats and abuse from teenagers. There are broken and dangerous footpaths.

We need better streetlighting to make the neighbourhood safer.

**We know this is the right costed vision for our area as we have completed extensive surveys with our residents, reviewed current data, and encouraged feedback at all our events.**
